PROFILE

Software engineer with 4+ years building React/Node.js internal applications, responsive products, API integrations, and AI-assisted workflows.

EXPERIENCE

Gradion · Software Engineer Sep 2025-Present

- Owned a React/Node.js performance review app used by about 300 employees across four countries and embedded in an internal workspace.
- Owned a multi-country purchase order system and invoice extraction flow that maps scanned invoices to the required finance format.
- Built AI workflows in the first AI lab at Gradion, contributed to hospital semantic search, and supported delivery with Grafana, Kubernetes, and Jenkins.

Aegona · Frontend Engineer Feb 2024-Sep 2025

Built booking and loyalty flows for an enterprise web/mobile platform and coordinated API integration with backend and mobile engineers.

Apps Cyclone · Frontend Engineer Sep 2022-Jan 2024

Built role-based education management screens and payment flows with Next.js 14 and REST APIs.

SELECTED PROJECTS

AI-assisted CV screening · Gradion n8n / Genkit

Built an n8n workflow to score CVs against job requirements, then a Genkit flow that uses reviewer feedback to refine prompts and improve screening output.

Enterprise super app · Aegona Web / mobile

Developed web and mobile features for accommodation and entertainment management, including booking, dynamic pricing, loyalty, and analytics using AngularJS, Flutter, Firebase, and Vendure.

Education portal · Apps Cyclone Next.js / REST

Built the frontend for a responsive education management portal supporting multiple user roles, REST APIs, and payment features with Next.js 14, Tailwind CSS, and Ant Design.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript · Frontend: React, Next.js, Vue/Nuxt, Angular, AngularJS, Tailwind CSS · Backend & AI: Node.js, REST APIs, PostgreSQL, n8n, Genkit, vector search · Testing & delivery: Vitest, Playwright, Grafana, SendGrid, Kubernetes, Jenkins · AI development tools: Cursor, Claude, Codex

EDUCATION

CTIM College · Information Technology · 2020-2023
